

## 2024 Spring Plant Sale Catalog

Category	What	Variety	Days to Harvest	Description
Fruit	Strawberry	Mix		
Herb	Basil	African Blue	-	African blue basil is a hybrid basil variety, a cross between camphor basil and dark opal basil. It is one of a few types of basil that are perennial. African blue basil plants are sterile, unable to produce seeds of their own, and can only be propagated by cuttings.
Herb	Basil	Genovese	-	Authentic Italian heirloom variety for perfect pesto, tomato dishes & pasta and more. Produces abundant, intensely fragrant, richly flavored glossy-green leaves on branching, productive plants.
Herb	Basil	Italian Pesto	-	Glossy dark green leaves and full-bodied zesty flavor is the classic strain for making pesto. Combine the delicious leaves with garlic, olive oil, grated cheese and toasted nuts to make homemade pesto sauce for pasta, baked potatoes or to accent fish or poultry, season soups and stews, or enhance salad dressings. You'll have luscious leafy harvests all summer with plenty to freeze for winter feasting too!
Herb	Basil	Mammoth	-	Featuring extra large, lettuce-like leaves with exceptional flavor, Mammoth Basil might be that variety you never knew you were missing from your kitchen garden!
Herb	Basil	Thai	-	Thai basil is a popular herb in Southeast Asian cuisine. It holds its flavor and texture better after cooking than other basil varieties and adds a kick to salads when sliced and eaten fresh. Thai's dark purple flowers and intoxicating scent make it a beautiful addition to the flower garden. A terrific container variety.
Herb	Chamomile	-	-	Chamomile or camomile is the common name for several daisy-like plants of the family Asteraceae. Two of the species, <i>Matricaria chamomilla</i> and <i>Chamaemelum nobile</i> , are commonly used to make herbal infusions for beverages.
Herb	Lemon Balm	-	-	Lemon balm ( <i>Melissa officinalis</i> ), a member of the mint family, is considered a calming herb.
Herb	Oregano			Oregano is a species of flowering plant in the mint family Lamiaceae. It was native to the Mediterranean region, but widely naturalised elsewhere in the temperate Northern Hemisphere. Oregano is a woody perennial plant, growing 20–80 cm tall.
Herb	Parsley	Italian	-	Italian parsley is a variety of the parsley plant used as an herb in a wide range of cuisines around the world. The slender stems give way to dark, flat leaves that taste robust and fresh.
Herb	Savory	Winter	-	<i>Satureja montana</i> , is a perennial, semi-evergreen herb in the family Lamiaceae, native to warm temperate regions of southern Europe, the Mediterranean, and Africa. It has dark green leaves and summer flowers ranging from pale lavender, or pink to white. The closely related summer savory is an annual plant.

Category	What	Variety	Days to Harvest	Description
Herb	Thyme	Lemon	-	<i>Thymus citriodorus</i> , the lemon thyme or citrus thyme, is a lemon-scented evergreen mat-forming perennial plant in the family Lamiaceae. There has been a great amount of confusion over the plant's correct name and origin.
Miscellaneous	California Buckeye	-	-	<i>Aesculus californica</i> . California/Santa Clara County native tree. Between 15-40' tall with a spread of 30-60'. Full sun to part shade. Grows as a multi-trunk, rounded tree with silver-white bark and large compound leaves. Leaves appear in late winter/early spring, followed by fragrant, white, bottlebrush-like flowers on branch ends. Its flowers serve as an important nectar source for native bees and migrating butterflies. Large, spherical seeds form in summer as the tree tends to go deciduous. Mature seeds drop in fall and germinate readily. Water twice a month once established. Drought tolerant, but its appearance is improved with some water. May be kept as a specimen in a large (30+ gallon) container and can flower in as little as five years. Caution: All parts of the fruit are toxic.
Miscellaneous	California Sand Aster	-	-	<i>Corethrogyne filaginifolia</i> . California/Santa Clara County native perennial. Up to 1' tall and 4' wide. Full sun to part shade. A dense carpet of evergreen, silvery foliage that sports a multitude of lavender, daisy-like flowers from summer into fall. Tolerates clay soil. Water once a week once established or naturalize.
Miscellaneous	Cat Grass	(Oat)	-	Fibrous cat grass can be served fresh, year-round to assist your cat with digestion, and may help prevent furballs. Grass is ready for cats to eat when it is 2"-4" high; place near their water or food bowl for only a few minutes so that they don't binge. Feed for a few minutes at a time on a regular basis to get your kitty's tummy used to it, allowing absorption of all the nutrients. Great for dogs, too!
Miscellaneous	Cat Nip/ Cat Mint	-	-	Catnip is a multi-purpose plant. The tea is very pleasant with a lemon-mint flavor and fragrance. Along with fresh catnip planted in containers indoors year-round, catnip toys filled with dried leaves will provide your feline friends with hours of fun. But be warned; they may ignore you for a while! Catnip is very hardy and grows in almost any soil; self-sows readily.
Miscellaneous	Citrus	Calamansi	-	Prized in the Philippines. Prolific fruit production with small sour orange fruit used as a lime. Fragrant blooms enhance this ornamental tree.
Miscellaneous	Gooseberry	Ayacucho Giant Cape	-	<i>Physalis peruviana</i> . Perennial. 1'-3' tall. A varietal cape gooseberry, recently found in the Ayacucho region of Peru by plant explorer J. Simcox. It bears plump fruits, larger in size than standard cape gooseberries, with excellent, sweet flavor. Protect from frost. May be grown in a large container. Commonly marketed as "goldenberries" in grocery stores.
Miscellaneous	Hummingbird Sage	-	-	<i>Salvia spathacea</i> . California native perennial. 1-3' tall and spreads by rhizomes to a width of ~4'. Full sun, part shade or shade. Evergreen. Deep rose-pink flowers bloom on tall central stalks from spring to summer. Loved by hummingbirds. Can be deadheaded and lightly pruned in summer if a neater appearance is desired. Water twice a month once established. Drought tolerant, but supplemental water improves the look of its foliage.

Category	What	Variety	Days to Harvest	Description
Miscellaneous	Narrowleaf Milkweed	-	-	<i>Asclepias fascicularis</i> . California/Santa Clara County native perennial. Winter deciduous. Up to 3' tall and 1' wide. Full sun to part shade. Host plant for the monarch and queen butterflies. Pinkish-white flowers bloom from June to September. Spreads to form small colonies. Protect from caterpillars during first year to aid in establishment and ensure plants are large enough to provide adequate forage. Cut down to 8" in early winter. Water twice a month once established. Drought tolerant.
Miscellaneous	Raspberry	Heritage		Heirloom. This flavorful everbearing variety is very productive, with medium to large, firm, red fruit. It produces from mid-summer into fall on vigorous, hardy canes. A popular variety worldwide, it is good for fresh eating, freezing, and processing.
Miscellaneous	Scarlet Monkeyflower	-	-	<i>Erythranthe cardinalis</i> . California/Santa Clara County native perennial. Up to 3' tall and 2' wide. Full sun to part shade, but it seems to do best in partially shaded areas. An herbaceous, creeping plant with downy, apple green leaves and tubular orange-red flowers that is a hummingbird magnet. Blooms from summer into fall. Cut back hard in late fall or early winter to improve appearance. Self-sows. Does well in containers. Provide regular water.
Miscellaneous	Valerian	-	-	<i>Valeriana officinalis</i> . Perennial. Part of the Caprifoliaceae family, valerian produces white to light pink flowers in the spring that grow in clusters of branched panicles. Growing three to five feet tall, it has light green leaves that are small and almost fern like on the main stem of the plant. Dies back to the ground in winter. Grows in sun/part shade and average to wet, well-drained soils. Protect from harsh afternoon sunlight. May be container grown.
Miscellaneous	Yarrow	-	-	<i>Achillea millefolium</i> . California/Santa Clara County native perennial. Up to 3' tall and 1.5' wide. Full sun to part shade. Abundant umbels of tiny, white flowers appear above soft fronds of small, green leaflets from spring through summer. Attracts numerous pollinators. Considered semi-evergreen, yarrow naturally goes dormant as seeds are maturing, but foliage can be kept green with supplemental water. Spreads by rhizomes. Yarrow's durability, adaptability, and low water requirements make it a good groundcover plant for lawn replacement. Can be watered up to once a week once established or naturalized.
Vegetable	Bean - Bush	Blue Lake Bush Bean 274	60	Blue Lake 274 merits its longtime popularity and standing as a classic. Heirloom plants produce plump, tender 5–6" white-seeded pods prolifically over a long season. Fiber-free beans are delicious stir-fried, steamed—or sautéed, and accented with garlic. Early-yielding plants require no support.
Vegetable	Bean - Pole	Fortex	60	Dependable favorite with excellent flavor. Growing to over 11", requires trellising, produces extra-long round pods. Early and very productive, the beans may be picked at 7" length for extra-slim "filet" beans. Green, firm-textured pods are completely stringless and delicious at all lengths, even after the seeds enlarge. Walnut brown seeds.
Vegetable	Bean - Pole	French Pole Filet Gold	60	These hard-to-find, handsome yellow filet pole beans were originally bred by French seedmen for their domestic market. French Gold are true "haricot verts" beans: classically slim, round 7-9" pods with delicate, sweet flavor and a crispy snap that makes them especially choice eating. The heavy bearing, vigorous vines yield extra-fancy, juicy pods to enjoy over a long season of harvest.
Vegetable	Bean - Pole	Kentucky Wonder	70	The classic variety for heavy crops of meaty, tender, 6" long pods with delicious flavor. Easy to grow & productive over a long harvest period. Vines are vigorous with heavy yields.

Category	What	Variety	Days to Harvest	Description
Vegetable	Bean - Pole	Rattlesnake Snap	60-90	(aka Preacher Bean) Distinctive dark green pods streaked with purple grow up to 8" long. Light buff seeds splashed with dark brown, resembling a rattlesnake's coloration. Very fine flavor. Vines grow vigorously to 10'. Good resistance to drought.
Vegetable	Bean - Pole	Yard Long Red	50-80	The red pods grow to 24-26" and are tender to 18". Pink red seeds. Very reliable, trouble-free variety excellent for the home garden. The red color is retained with cooking. The pods are stringless and the flavor is similar to asparagus. Good in stir fries.
Vegetable	Cantaloupe	Charentais	75-90	A true French cantaloupe that originated in the Poitou-Charentes region circa 1920. Considered by many to be the most divine and flavorful melon in the world. Smooth round melons mature to a creamy gray with faint ribs. Sweet, juicy, orange flesh with a heavenly fragrance. Typically the size of a grapefruit and weighing 2 lbs — perfect for two people.
Vegetable	Cantaloupe	Hale's Best Jumbo	80	1920s overnight muskmelon sensation, owing its popularity to excellent flavor with earliness. Beautifully ribbed oval melon with deep-green skin and golden netting. Firm, salmon-toned flesh is aromatic and sweet. A refreshing breakfast treat and a savory hors d'oeuvre when partnered with prosciutto. Thrives in hot weather. Plant at the base of a trellis so vines can climb.
Vegetable	Cantaloupe	Minnesota Midget	60-70	This delightful little melon introduced in 1948 by the University of Minnesota produces loads of 4" fruit, sweet and juicy to the rind. Melons in general, love long, hot seasons, but this variety is specially suited to areas with a short growing season, though it can be grown anywhere. Compact, 36" plants, great for containers. Plants are Fusarium wilt resistant.
Vegetable	Corn	Blue Jade	75	One of the only sweet corns that can be grown in containers, the 3' tall plants of this variety bear 3-6 ears. Peak time for eating is when kernels are just turning blue, but can be eaten when white or steel blue. This variety is from Dutch seedsman and Seed Savers Exchange member Kees Sahin. Great for fresh eating or freezing.
Vegetable	Corn	Golden Bantam Improved 12 Row	85	An improved version of the old standard yellow sweet corn. Instead of eight rows of kernels, this variety has 10-14 rows and the ears are slightly longer. It was also selected to stay tender longer. 'Golden Bantam Improved 10 to 14 Row' was introduced in 1922 by the Everett B. Clark Seed Company of Milford, Connecticut and was developed as a selection of the 'Golden Bantam.'
Vegetable	Corn	Stowell's Evergreen	95	One of the oldest, if not the oldest, named sweet corn varieties in existence. It is a late season variety that yields 8" long ears that have anywhere from 10-14 rows of sweet, white, tender kernels. It keeps longer than most, which makes it one of the best heirloom varieties for the table, canning, and freezing. Because of these excellent traits, it has been a home garden and market grower favorite sweet corn variety since 1848.
Vegetable	Corn	Chinese Baby	83	Also known as Japanese Hulless corn, it grow 4-5' tall and bears 3-6 four" long ears. Pick early to eat as a baby corn, good in stir fries or on salads, or allow to mature to dry ears and use as a popcorn.
Vegetable	Cucumber	Armenian	50-75	Light-green, heavily ribbed fruit that grows 24-36" long x 3-4" diameter, best eaten at 12-18". Mild, sweet flavor with non-bitter skin. Can grow on a trellis for straight cucumbers or allow to ramble on the ground for interesting shaped fruit. Prolific and thrives in hot weather.

Category	What	Variety	Days to Harvest	Description
Vegetable	Cucumber	Ashley	55-65	This variety has rapidly become the go-to cucumber for gardeners as well as market gardeners. Disease-resistant, heat tolerant, and less susceptible to powdery mildew, this variety is a great one to grow. Plants produce many cucumbers around 7-8" in length and are terrific for salads, pickles, and fresh eating. Ashley cucumbers are very low on vines making them easy to handle and harvest.
Vegetable	Cucumber	Beit Alpha	55	A delicious, very sweet cucumber that is usually picked small and does not need peeling, as the skin is very tender. This variety is very popular in the Mediterranean, having been developed in Israel at a kibbutz farm, and it is now becoming popular with Americans because of the fruit's fine flavor and high yields. This cuke is also burpless and has great shelf life. A parthenocarpic variety, you can grow in a greenhouse without pollinators.
Vegetable	Cucumber	Burpless Beauty	60	The super-productive vines yield loads of long, deep green cucumbers that stay crisp longer than any other we've tried. Pick and slice to reveal the pure white, firm flesh with an exceptionally small seed cavity. The thin-skinned cukes have the right balance of crispness and juiciness-and these mild beauties are easy on the digestion. Disease-resistant plants set fruits over several months.
Vegetable	Cucumber	Double Yield	50-60	Heirloom. Very productive variety, good to grow for gherkins, dills or fresh eating. Dark green slender fruits, 5-6" long by 2" diameter. High percent of sets produce two fruits at each leaf joint.
Vegetable	Cucumber	Early Fortune	55	A super dependable garden cucumber, great for pickles and slicing. Fruit grows 7 - 8" long, 2" in diameter.
Vegetable	Cucumber	Japanese "Tasty Green" F1	60	Crunchy, juicy and thin-skinned, long "burpless". These cucumbers combine vigor and productivity with fine sweet flavor and especially refreshing crispy texture. The vigorous vines bear early, yielding abundant slender 10-12" fruits that never need peeling.
Vegetable	Cucumber	Lemon	65	A gardener's favorite since 1894 but hard to find in grocery stores, this unusual, eye-catching, lemon-sized cucumber has excellent flavor and is a great slicer or pickler. It is scrumptious eaten with the skin and all just like you would an apple; non-bitter and burpless. Plants are more drought tolerant than other varieties.
Vegetable	Cucumber	Marketmore 76	70	Fruit averages 8-9" long, perfect for slicing. Dark green with thick protective skin, a perfect choice for market gardening as the rugged little fruit stand up well to shipping but still have the high quality of flavor and texture that grocery store cukes simply can't match!
Vegetable	Cucumber	Muncher	62	Dual purpose cucumber for both eating fresh and pickling. This tender variety is excellent for fresh eating right out of the garden. Muncher is nearly spineless. Fruits are 6-8" long and 3" wide, with strong vigorous vines. Non-bitter, burpless variety, can be eaten at any stage of growth. If using for pickles, pick when the fruits are 4-6" long.
Vegetable	Cucumber	National Pickling	55	This variety holds its quality longer than most and is a top-notch selection for pickling when harvested young. In smaller gardens, planting this pickling cucumber variety along a fence or trellis is the way to go! You can prepare flavorful and crunchy pickles with no bitterness every time.
Vegetable	Cucumber	Persian Baby "Green Fingers" (F1)	60	F1 Hybrid. Appetizing little Green Fingers are cute mini cucumbers that are smooth, thin-skinned, crispy, and ready to pick when just 3 to 5" long. The vigorous, powdery mildew tolerant vines are self-pollinating, early-bearing, and set fruits reliably even in difficult conditions. Enjoy these quality baby cucumbers all season long.

Category	What	Variety	Days to Harvest	Description
Vegetable	Cucumber	Poona Kheera	50	Cultivated in Poona, India, this unusual variety changes color drastically with maturity and can be eaten at every stage. When young, bright yellow skin is produced which eventually turns a rosy russet color with age. Fantastic crunch and mild flavor, perfect for fresh eating. Heavy yields of 4-5" fruit that require trellising.
Vegetable	Cucumber	Shintokiwa	75	Smooth skinned, long and slender (like an English cuke), sweet, crisp, and juicy with no bitterness. Wonderfully productive. Trellis for straight 9-12" cukes or let sprawl for mostly straight and some with personality. Harvest on the thinner side for the best flavor.
Vegetable	Cucumber	Spring Burpless	52	These long, slender cukes offer a crisp, mild, bitter-free and burpless bite all season long. Firm and easy to peel, they should become your cucumber of choice. Expect Early Spring Burpless to reach 8-12" long in no time. For straight fruit, stake them on a cucumber support. Or, if you like the look of curly cukes, let them grow on the ground, where they'll twist up.
Vegetable	Cucumber	Straight Eight	58	An All-America Selections winner, Straight Eight has cool, firm flesh and a bright, sparky taste. For peak flavor and ultimate toothsome texture, pick when 8" long. Best grown on a fence or trellis.
Vegetable	Cucumber	Telegraph Improved	60	The English cucumber is longer (up to 18") and thinner than traditional cucumbers, with very small, soft seeds. 'Telegraph Improved' was developed in the 1800s for growing in greenhouses, but is now a favorite of home gardeners for the long, thin-skinned, burpless fruits that add a cool, mild flavor and a snappy crunch to salads and sandwiches. Best when trellised and watered regularly when fruit is forming.
Vegetable	Cucumber	Tokiwa Tokyo Green	60	Great Taste! The small, 9" fruit with tender skin and few seeds makes excellent pickles and sets the standard for slicing cucumbers; buttery soft, supremely sweet, and never bitter. This old Japanese variety, also known as "Tokyo Green," came from China in the Meiji era, then became the dominant variety sold around Tokyo. They do well on fences and trellises, saving space in the gardens. Vines are almost mildew proof and well adapted to hot, dry summers.
Vegetable	Eggplant	Aswad	80-85	This massive dark purple variety can grow up to 3 pounds or more. Its sweet and tender flesh makes it a delicious variety to grill or bake. Originally from Iraq, this variety is heat tolerant and will produce abundantly.
Vegetable	Eggplant	Black Beauty	75-80	A garden staple for over 100 years! Black Beauty has become the common market eggplant of today. This eggplant can be enjoyed roasted on salads or as a meat substitute but when harvested fresh, however, makes all the difference!
Vegetable	Eggplant	Casper	75	A true white eggplant. A rare Japanese variety that produces long 5-8" slender fruits that are creamy-white to almost pure white. Soft and small-seeded. When ripe the skin will lose its sheen and be slightly soft to the touch. Great in stir-fries and Italian dishes with its mushroom-like flavor and silky texture.
Vegetable	Eggplant	Diamond	70-75	Known for excellent texture and flavor, this variety bears dark-purple eggplants with green-tinted flesh that are 9" long and 3" in diameter. The fruits grow in clusters of four to six on 2' tall plants, disease-resistant, and rarely bitter. Great for roasting, baking, grilling and stewing!
Vegetable	Eggplant	Listada de Gandia	90	One of the most popular heirloom types, this one has 7" long fruit that is white with lovely bright purple stripes. It is so beautiful and has fabulous flavor with sweet, tender flesh. No need to peel! This excellent variety hails from Spain, a country that is renowned for fine food.

Category	What	Variety	Days to Harvest	Description
Vegetable	Eggplant	Long Purple	70-80	The Long Purple eggplant is considered a favorite productive Italian type of eggplant! This eggplant is a an old heirloom that was first brought to America in the 1870's by B.K. Bliss of New York. This variety produces good yields of mildly flavored eggplants that are 8-10" long by 2" wide. The Long Purple has a dark purple and glossy skin with pale white flesh that has few seeds. This variety is the most flavorful and tender when harvested young at 5-6" long. The Long Purple is a great variety for slicing and adding to different Italian dishes, such as lasagna.
Vegetable	Eggplant	Louisiana Green	75-100	A southern heirloom variety, Louisiana Long Green produces extra sweet, long and slender fruits on tall, prolific plants. Downright non-bitter, these mild tender-skin Eggplants are velvety, pale lime-green with creamy-white flesh that is meaty and full-flavored. Pick them when they are slightly immature, before they are 9" long, for their texture and flavor. They are quick and easy to cook.
Vegetable	Eggplant	Rosa Bianca	80	A simply elegant eggplant from Sicily. Light pink-lavender fruit has soft white shading and a gently scalloped form. Mild flesh is very popular with chefs and gardeners alike! No bitterness. A great variety for heirloom market growers.
Vegetable	Eggplant	Snowy	65	A warm season tender annual, the unique color makes it a stand out variety. With uniform, 7" long ivory fruits that are firm and meaty, it holds up well in cooking where others may turn to mush. Can be adapted to containers, for those with limited garden space or short growing seasons.
Vegetable	Eggplant	Turkish Orange	70-80	This variety produces 4", round, deep orange fruits that resemble oranges hanging on a small tree! Beautiful green streaks add character with a flavor that is a bit softer than a traditional eggplant. This variety is soft and buttery when cooked or fried. The seeds are smaller and less noticeable which gives this variety a desirable texture for cooking. The richest flavored eggplant variety in the world.
Vegetable	Gourd	Green Bitter Melon	70	AKA Chinese bitter gourd. The fruits are excellent in broths, soups, or stir-fries, and the leaves and shoots are also edible. Bitter melon is high in quinine, which gives the fruits their distinctive, mildly bitter taste. It is also used in traditional medicines for treating diabetes and digestive issues. This variety grows 8-10" inch long, green, thin-skinned fruit on vigorous vines. The slightly warty fruits should be harvested green and when under 8" long and 3" in diameter; once they begin to turn orange and ripen, the taste is less pleasing.
Vegetable	Gourd	Luffa	100	The fruit grows about 2', Tasty cooked like okra when young, edible when small and tender. Grow your own natural dishcloth or bath sponge.
Vegetable	Gourd	Opo	35-50	Bottle gourd, also known as bottle squash, calabash gourd, Doodhi, or Lowki is a delicious vegetable that has many uses. Its delicate nutty flavor adds greatly to hot curries as well as cooling yogurt dishes like Raita. It can be used like squash but it has a firmer, crisper texture. It is a light green variety, with uniform straight tender fruits, 1-1.5 ft long.
Vegetable	Gourd	White Bitter Melon	55-65	This white color bitter gourd is a prolific India-type bitter gourd hybrid. Fruit size is about 11-12" long, weighing over a half pound. Bitter gourds are nutritionally dense and are recommended as a healthy food by the American Diabetic Association. The immature fruits, as well as the young shoots and leaves, are edible. Karellas are widely used in Southeast Asia and do well when incorporated into the cuisines of those areas.

Category	What	Variety	Days to Harvest	Description
Vegetable	Melon	Boule D'Or	95-110	Very sweet, pale green flesh is just marvelous. Lovely yellow fruit has a unique, lacy netting, like a work of art. This truly incredible melon trialed with top marks. An all-time favorite honeydew type. Sugary flesh is so flavorful and rich. This variety is a dream for market growers and will command high prices with gourmets and chefs alike!
Vegetable	Melon	Canary	100	A bit larger than most cantaloupes or honeydews, the Canary Yellow Melon is as bright and cheerful as its name implies. It has a brightly-colored yellow rind, light-green flesh, and a sweet, delicate flavor. These melons store well and get up to 6 pounds. The rind will feel somewhat waxy when the melon is ripe.
Vegetable	Melon	Casaba Sungold	85-110	Sungold is the earliest ripener of the casaba melons, making it a good choice for short-season summers. Developed by a professor at the University of New Hampshire, the melon is 7"-8" long, acorn-shaped with a yellow-green rind, and weighs 6-9 lbs. Popular for its luscious flesh that is sweet and a bit spicy.
Vegetable	Melon	Eden's Gem	65-80	Productive, early-maturing variety. Developed in 1905 at Rocky Ford, Colorado as a "crate melon." Softball-sized netted fruits weigh in at about 1 pound. The green flesh has a complex spicy flavor.
Vegetable	Melon	Eel River	80-90	Like Crenshaw type melons, they are 3-5 lbs, slightly teardrop-shaped, and yellow/buff colored with green speckles. The incredibly aromatic orange flesh is very creamy and deliciously sweet.
Vegetable	Melon	Hami	80-100	Large, several pound melon well-known in China. It is similar in flavor to a sweet cantaloupe, and having a juicy white-orange pulp.
Vegetable	Melon	Ha'Ogen	75-80	Although this variety is most likely of Hungarian descent, this muskmelon is generally identified with Kibbutz Ha'Ogen in Israel. Ha'Ogen is Hebrew for "the anchor." Vigorous vines produce fruits with sweet, spicy green flesh that range from 2 - 4 pounds. Melons will generally slip from the vine when ripe.
Vegetable	Melon	Honeyrock	74-88	Heirloom. Honeyrock melons grow up to 6" in diameter and 3-4 lb. Tough gray-green skin with a coarse open net protects thick, sweet deep-salmon flesh. Resistant to fusarium wilt. Expect 5-7 melons per plant. Developed at Michigan State and was an All American Selection in 1933. Also called Sugar Rock.
Vegetable	Melon	Model	76	Crisp, juicy texture and electrifying green flesh; the sugary flavor is amazing! The green orb-shaped fruit is lightly netted. The green flesh is thick, very aromatic and sweet. Hailing from Poland, these melons are about two to three pounds each. Extra fancy looking!
Vegetable	Melon	Mother Mary's Pie	75-80	Named after the donor's mother who used equal amounts of melons and apples in pie. Highly productive, early maturing fruit is small, yellow, and round with white flesh. Fruit can be peeled like an apple. Harvest while still firm for best cooking qualities.
Vegetable	Melon	Oka (Bizard Island Strain)	80	Large fragrant fruited heirloom, with rich orange flesh that is very fragrant and its taste exquisite. Oka Melon is very hardy, ready in about 80 days. The skin is light green with concentric ridges running top to bottom. It's juicy, rich tasting orange flesh can also be dried and then it tastes like mangos!
Vegetable	Melon	Petit Gris de Rennes	85	Dense, 2- to 4- lb fruit has orange flesh that is superbly sweet, flavorful, and perfumed. This variety is early and well adapted to cool climates. This fine French variety is of the best quality and is the favorite melon of the French melon expert and author Bruno Defay. Rare in the U.S.

Category	What	Variety	Days to Harvest	Description
Vegetable	Melon	Sakata's Sweet	70	A sweet treasure from historic Japan. These delightful melons are a mini-honeydew type! The lilliputian 3- to 4-inch round melons are very sweet with a high sugar content. Crisp and crunchy-; they have edible skins. This fine Japanese variety was developed by Sakata's Seed Co., of Yokohama.
Vegetable	Okra	Clemson Spineless	60	Originally developed at Clemson University and improved in 1980 for an earlier, more productive harvest. These heat-loving plants produce dark green, grooved, straight pods with a full-bodied flavor that okra lovers find utterly delectable. Related to hollyhocks, the plants' beautiful flowers make them a pretty addition to the flower garden and they attract pollinators.
Vegetable	Okra	Star of David	70	One of the most beautiful okra varieties. The super thick pods resemble the Star of David when sliced, making it a unique and eye-catching edible ornamental. This tasty heirloom is said to originally hail from Israel, and indeed it is a popular heirloom among Israeli seed companies and gardeners. The precise origins remain unknown.
Vegetable	Pepper - Hot	Aleppo	75-85	<b>RARE.</b> AKA Halaby Pepper. The famous Aleppo pepper is a popular spice and ingredient in a number of Middle Eastern and Mediterranean dishes. Pods grow to several inches long and up to an inch and half wide. Flavor is moderately hot, with fruity and sometimes raisin-like overtones. The peppers are traditionally used dried, usually in flakes.
Vegetable	Pepper - Hot	Bulgarian Carrot Chili	66	Also known as "Shipkas," these compact heirloom chiles bear heavy sets of early maturing, 3" glossy orange pods shaped like little carrots. Bulgarian Carrot chiles are both hot and fruity and really delicious in fresh salsas, for scrumptious sauce, or any dish or sauce that calls for both heat and lots of flavor. Their thicker, crunchy walls are perfect for hot pickled peppers. Carrot chiles rank between Jalapenos and Cayennes in heat levels.
Vegetable	Pepper - Hot	Golden Greek Pepperoncini	75	This is the Greek pepper most commonly found pickled and in salad bars or sandwich shops. It is also much sweeter than the Italian variety. It is similar to the sweet banana because both peppers are slightly sweet and tangy, but the pepperoncini brings a little bit of heat. Also thinner walls make it a better for pickling. It is also known as the Friggittello pepper, Sweet Italian pepper, or Tuscan pepper.
Vegetable	Pepper - Hot	Jalapeño Early	70-75	Early Jalapeno pepper has dark green fruit that grows to a length of 3" and can be left on the bush to mature into a fiery red pepper with medium heat. The compact and sturdy growth makes it a perfect pepper variety for containers. This pepper will stand out in your garden, featuring vigorous plants with an excellent yield. You won't have to wait long to enjoy the bold flavor of this famous pepper; it's ready for harvest in a little over two months.
Vegetable	Pepper - Hot	Kalugeritsa	80-90	<b>RARE.</b> A beautiful and delicious pepper from North Macedonia. This jalapeño-level hot pepper is named after the village of Kalugeritsa where the seeds were collected. The flavor is full bodied, and it is one of the best peppers for roasting!
Vegetable	Pepper - Hot	Mad Hatter	90	You won't have to fall down a rabbit hole to bring the 'Mad Hatter' to your garden! Whimsical green and red peppers resembling hats bring fun to the vegetable patch. Peppers are sweet, crisp and crunchy with a subtle floral scent. Flavors intensify as fruit ripens. Hot, dry climates may produce fruits with a hint of heat at the center, but the outer parts remain sweet. Your family will be mad for this pepper!

Category	What	Variety	Days to Harvest	Description
Vegetable	Pepper - Hot	NuMex Joe E Parker	75	NuMex Joe E. Parker' is the ideal pepper for roasting, stuffing, or canning, in addition to using fresh. This pepper has thick walls, uniform, 6"-8"-long fruit, with few seeds and big yields. Peppers turn red when mature. 500-2,500 Scoville heat units (mild).
Vegetable	Pepper - Hot	Padron	60	Originating from Spain, pick these thin-skinned peppers when they are small, about 1-1 ½" long. Most are mild but you might get one or two that are quite spicy. But if left to grow to maturity, the fruit will be hot. Sauté whole in olive oil with a little sea salt. Commonly used in traditional Tapas.
Vegetable	Pepper - Hot	Poblano	75	One of the most popular chilis in Mexico! 3- to 6-inch heart-shaped fruit is usually of gentle heat, at around 2000 Scovilles. Used green, after roasting and peeling, it is the classic pepper for chili rellenos. Dried, the fruit turns a rich dark red-brown and may be ground into an authentic red chili powder. Plants reach 2 feet or so.
Vegetable	Pepper - Hot	Red and Yellow Biquinho	72	These Brazilian peppers are tangy, sweet, and smokey with a touch of heat. Biquinho (bee-KEE-nyo) means "little beak" in Portuguese; it is also known as button, piquillo, or chupetinha pepper. Green peppers ripen to red or yellow and are traditionally pickled and served as appetizers or a drink garnish. A unique pepper that all can enjoy. 1,000–2,000 Scoville heat units (mild).
Vegetable	Pepper - Hot	Red Vesuvius	85	Fiery little fruits point up like flames, with that nutty, incendiary pungency just right for stir-fries. Use fresh or air dry for tantalizing Asians style dishes.
Vegetable	Pepper - Hot	Serrano	75-90	73 days. Small, finger-shaped, hot peppers picked green or red. Easy to dry. Serrano will give you dozens of medium-thin walled fruits per plant. Pick them early when the peppers are green and more mild or wait until they are mature and "red hot", at about 10,000 Scovilles.
Vegetable	Pepper - Hot	Shishito	75	A favorite old Japanese variety which produces 3 inch long, slightly wrinkled fruit that is perfect for making tempura and other traditional recipes. Fruit is emerald green in color, ripening to red, and mildly flavored with just a bit of spice.
Vegetable	Pepper - Hot	Thai Hot	90	Discover the delights of 'Thai Hot' flavor in your favorite stir-fry or other Asian dish! Compact, mounding 8" tall plants covered with 1½"-3" long, upright red and green peppers at the same time is a festive and decorative choice for patio containers. 50,000-100,000 Scoville heat units (very hot).
Vegetable	Pepper - Hot	Tibetan Lhasa	72	These fragrant, fiery, flavorful 4 inch chiles are the most widely grown variety in Tibet, where they are made into a spicy sauce or a tongue-tingling paste used in many dishes or served as a condiment that adds heat and savor to everyday meals. Plants bear heavy sets of multiple straight pods that quickly mature from green to rich deep red early in the season, and keep producing for long extended harvesting.
Vegetable	Pepper - Sweet	Ajvarski	80	<b>RARE.</b> 2', stocky plants are covered in 6- 7", broadly wedge-shaped pods that ripen from green to deep, rich red. These peppers are incredibly fragrant and tasty. In the Balkans, these thick-fleshed peppers are often roasted on flat metal stoves, peeled, then ground into a traditional relish called ajvar.
Vegetable	Pepper - Sweet	Chervena Chushka	85	(aka Chervena Chujski) Bulgarian pepper traditionally used for roasting; also delicious eaten fresh. Flesh is sugary sweet. Robust plants produce large tapered fruits measuring 2" wide by 6" long. Fruits ripen from green to brown to vivid red.

Category	What	Variety	Days to Harvest	Description
Vegetable	Pepper - Sweet	Cubanelle	65	Also known as "Cuban pepper", the Cubanelle is a variety of sweet pepper commonly used in Cuban, Puerto Rican, and Dominican cuisine. Many cooks prefer it to bell types. Sweet Cubanelle peppers can sometimes be slightly hot, but with only a touch of heat. This 6-8-inch pepper is prized for its sweet, mild flesh, rich flavor, and pretty colors. The thin-walled pepper is especially suited for quick cooking and has a low water content.
Vegetable	Pepper - Sweet	Elephant's Ear	90-100	<b>RARE.</b> One of the choice varieties of sweet pepper used in making the roasted pepper relish called ajvar, "Elephant's Ear" (Slonovo uvo in Serbian) is named for its impressive appearance. Plants produce big, beautiful peppers that can be 6" long x 4" wide, slightly flattened and with a pointed tip. Fruits ripen from green to bright red with thick walls and very sweet flavor. Very reasonable maturity for such a big sweet pepper.
Vegetable	Pepper - Sweet	Giallo	75-85	This long, curved Pepper was named for a bulls horn. Has a complex flavor: somewhat sweet, with a touch of heat. An heirloom variety from Italy, Corno is popular with Italian chefs and homemakers alike. Tall, sturdy plants produce lots of attractive 8" to 10" fruit.
Vegetable	Pepper - Sweet	Gourmet Orange Bell	75	Super sweet, brilliant orange fruit is blocky and good-sized with thick flesh that is flavorful and among the best tasting of all peppers. Plants produce large yields of this most magnificent pepper.
Vegetable	Pepper - Sweet	Healthy	70	Sweet 4 inch long conical fruits ripen from yellow-green to orange then red. Early maturing 30 inch plants are resistant to disease and rotting and will ripen even during cloudy summers. Developed at the Institute of Vegetable Breeding and Seed Production on the western edge of Moscow. Great for fresh eating, roasting and salsa.
Vegetable	Pepper - Sweet	Keystone Resistant Giant	70	Giant Keystone Sweet Pepper matures in 70 days. Keystone Sweet Pepper grows huge 4" fruit with very thick and sturdy walls. Sweet Peppers turn from green to red over time, which brings a versatile producer in the garden.
Vegetable	Pepper - Sweet	Osmarsko Kambe	80-90	<b>RARE.</b> A specialty of Bulgaria, this heart-shaped, pimiento type pepper ripens from green to bright red with very thick walls and wonderful sweet flavor. It is the perfect small size for stuffing, yet substantial enough for roasting. Early and very prolific, the plants sport a superb architecture: sturdy, compact, and upright, keeping the fruits up off the soil even in wet conditions.
Vegetable	Pepper - Sweet	Tabby Golden Bell	75	Easy to grow, easy to look at and tasty to eat, 'Golden Bell' will brighten up your Pepper garden with the brightest of gold colored 3 long by 2.5 wide blocky fruit in superb quantities. Excellent for salads, baking or stuffing, its bright, pleasing color seems to enhance its flavor! Fruit matures in 75 days from transplanting as they start out light green, but gradually morph from light green to light yellow to resonant golden yellow when mature.
Vegetable	Pepper - Sweet	Vivaldi Red Bell	75	These plump vigorous varieties combine mouth-watering rich flavor and juicy texture with high yields and excel.
Vegetable	Pumpkin	Jack-O'-Lantern	110	Heirloom. The best pumpkin for carving. This is the pumpkin you want for carving—and cooking. Finally recognized for their culinary pizzazz, pumpkins lend rich flavor to breads, bread pudding, soups, and pasta—not to mention the autumn awesomeness of pumpkin pie and spicy pumpkin chai. Fruits are medium-sized and round to elongated in shape.

Category	What	Variety	Days to Harvest	Description
Vegetable	Pumpkin	Jarrahdale	95-100	This unique variety is a true blue pumpkin! Plants will produce 4-6 medium-size pumpkins weighing around 4 to 10 pounds each. The flesh is deep orange and very thick. Carving is not really the best purpose, but for decoration it is beautiful. This variety is also incredible when roasted for pies, soup, or baked goods. Rich in flavor, creamy, and free of large strings. The seeds are large and delicious when roasted too. A very long storage pumpkin.
Vegetable	Pumpkin	Kakai	100	Semi-bush. Grow your own pumpkin seeds, with no hulls on them. Kakai is a 5-8 lb medium sized pumpkin and produces 2-3 pumpkins per plant. Orange with green-black stripes and deep ribs, it's a great display pumpkin as well as a seed source. Kakai is an Austrian pumpkin also used for pressing nutrient-rich, green pumpkin oil.
Vegetable	Pumpkin	Rouge Vif d'Etampes	110	The bright scarlet French pumpkin. Known as Rouge vif d'Etampes in France. "Rouge vif" means "vivid red." This is an attractive variety for fall display. Shaped flat, looking like a red cheese wheel, the fruits average 10–15 lb. The moderately sweet, orange flesh is excellent for pies. Also known as Cinderella.
Vegetable	Pumpkin	Sugar Pie	85-100	Heirloom. Also widely known as the New England pumpkin, the Sugar Pie is a true American heirloom and culinary standard. Can be harvested as early as 85 days, producing a small, round, and somewhat flattened pumpkin that is 7-10" wide. New England Pumpkin is sweet and fine-grained, and this makes it a perfect baking pumpkin. It stores well. This is the perfect small-to-medium pumpkin to grow in your garden.
Vegetable	Pumpkin	Winter Luxury	85-100	(aka Livingston's Pie Squash) Introduced in 1893 by Johnson & Stokes of Philadelphia. Amy Goldman, author of The Compleat Squash, says it is "the finest pie stock in the land." Fruits average 6 pounds, making them the perfect size for two pies. Orange rind is covered in delicate netting; flesh is smooth, sweet, and fiber-free. Not the best keeper, so enjoy it for Thanksgiving or early winter.
Vegetable	Scallion			Scallions are edible vegetables of various species in the genus Allium. Scallions generally have a milder taste than most onions. Their close relatives include garlic, shallots, leeks, chives, and Chinese onions.
Vegetable	Squash - Summer	Early Summer Crookneck	53 - 58	One of the most delectable summer squashes, this creamy crookneck is mild, sweet, and full of flavor. The star of any setting, it's just the centerpiece you need for your organic vegetable garden. Pick these fruits when they're small—5-6" long is ideal—and super tender. They have a creamy consistency and a gentle bite.
Vegetable	Squash - Summer	Early Yellow Straightneck	50	This early, prolific straightneck summer squash produces creamy yellow, tender fruit of excellent quality early in the season. Plants continue bearing if kept picked and cared for. It has a tapered, straight neck, not curved like Crookneck, making it perfect to slice into lengths for grilling.
Vegetable	Squash - Summer	Jaune et Verte	50	Unique tulip-shaped patty pan. Attractive light green fruits with dense, flavorful flesh are perfect for stuffing.
Vegetable	Squash - Summer	Odesa	60	Likely named after the city of Odesa (Одеса), a bustling port city on the Black sea near the mouth of the Danube, it's a "cousa" type, a summer squash typical to the Middle East with pale green speckled flesh and a bulbous blossom end. Like others of its type, Odesa has a very thin skin and exceptionally creamy flesh, slightly sweeter than other types of summer squash. Plants are vigorous, bush habit, and very productive.
Vegetable	Squash - Summer	Ronde de Nice	50	Centuries old heirloom that is particularly vigorous and long bearing. Abundant pretty pastel green round zucchini are treasured for their especially rich flavor.

Category	What	Variety	Days to Harvest	Description
Vegetable	Squash - Summer	Y-star	50	Y-Star is a classic yellow Pattypan Squash with a twist! The open, low-spine plants yield early and continuous harvests of nutty, sweet and tender, golden yellow fruits with scalloped edges and a lime-green circle on the blossom end. So pretty! Harvest at 2" to 4" wide for the best flavor, or allow them to mature and harden for fall displays.
Vegetable	Squash - Winter	Anna Swartz Hubbard	90-100	Given to Seed Saver Exchange by Anna Swartz of Pennsylvania who originally received it 40 years earlier in the 1950s. Introduced commercially by SSE in 1999. Anna loved this variety because of its extremely hard shell and excellent storage ability. High quality flesh is the color of a sweet potato with similar flavor. Fruits weigh 5-8 pounds.
Vegetable	Squash - Winter	Baby Spaghetti	85	Extremely productive vines bear dozens of 4-5 inch, little "mini" spaghetti squashes. The semi-compact vines can be trained up a fence/trellis so the little golden squashes hang like ornaments. These little minis cook up quickly, making it fast and easy to fork out their spaghetti like flesh to top with pizza sauce or a little butter and grated cheese for a quick, nutritious and low-calorie dish. After harvest, these little squashes store very well to enjoy for many good meals.
Vegetable	Squash - Winter	Banana Pink Jumbo	110	The Pink Banana squash is a great winter keeper! This popular jumbo squash can reach 48" in length and weigh up to 70 pounds! It is used for both canning and baking and is not stringy when picked when less than 30" long. The thin, brittle skin turns pink-orange at maturity, which is about 110 days.
Vegetable	Squash - Winter	Black Futsu	110	Black Futsu is an heirloom Japanese pumpkin with attractive, deeply ribbed, bumpy skin that cures from deep black-green to a warm orange buff color. Edible skin, and fine, nutty-flavored flesh. Great roasted, fried in tempura, pureed in pies or soups, or pickled! 3-5 fruits per plant, averaging 3 lbs. each.
Vegetable	Squash - Winter	Butterbush	75	A dwarf and super early maturing Waltham style butternut with some of the tastiest flesh we've ever tasted! Short season growers and those with compact spaces will rejoice knowing that the tidy vines reach just 3 feet long and bear medium sized, 2 to 4 lb fruit that is ready to harvest in just 75 days! Each hardy bush will produce 4 to 5 fruit considered to be long keepers.
Vegetable	Squash - Winter	Honey Boat	100	Many claim that this refined Delicata is the "sweetest squash in existence". Long fruits have the traditional green striping of Delicatas, but with coppery skin instead of the classic yellow. Holds well and keeps its sweetness through storage. Developed by Oregon State University vegetable breeder Jim Baggett.
Vegetable	Squash - Winter	Kabocha	100	A hardy and mouth-watering Japanese squash. Shaped like a buttercup with bright yellow-orange flesh and an exquisite sweet, nutty flavor. Great roasted, steamed, puréed and as a cooking/baking ingredient. Easy seeds to save!
Vegetable	Squash - Winter	Pineapple	95	Cream colored, fluted, acorn-type fruits have about ten finger-like ribs that protrude from the sides of each squash. Also makes an excellent ornamental type for fall decoration.
Vegetable	Squash - Winter	Red Kuri	92	A red-orange Japanese winter squash, fruit is 5-8 lbs each and teardrop-shaped. The golden flesh is smooth, dry, sweet, and rich; a great yielding and keeping variety. This style squash has been traditionally farmed in the Kanazawa, Japan area. It is said that Saichiro Matsumoto of Kanazawa brought this squash back from Fukushima in northern Japan, in 1933. It is one of the Kaga (old name of Kanazawa) traditional vegetables.

Category	What	Variety	Days to Harvest	Description
Vegetable	Squash - Winter	Silver Bell	100-105	A selection from Blue Banana bred and introduced by Ferry-Morse Seed Co. in 1956. Small bell-shaped squash average four pounds. Silvery gray-blue shell turns pink in storage. Delicious deep orange, dry, sweet flesh. Good keeper. Works well for baking, roasting, soups or pies.
Vegetable	Squash - Winter	Sweet Meat	115	One of the heirloom treasures of the Northwest. This 10–15 pound slate-gray round squash is renowned for its superb keeping quality and unsurpassed rich, sweet flavor. It makes the best pumpkin pie on Earth! Vigorous vines grow to 10 feet.
Vegetable	Squash - Winter	Thelma Sanders' Sweet Potato	85-95	Tender, sweet and delicious, Thelma Sanders' cooks up to a buttery-soft texture and unmatched flavor. Highly productive plants produce light beige deeply ridged acorn squash measuring 7 ½–8" with thick, orange-gold flesh. An heirloom originating from Missouri, this truly exceptional squash also stores very well.
Vegetable	Squash - Winter	Waltham Butternut	100	An old favorite. Good yields with excellent-tasting, rich, orange-colored flesh. Great baked! Introduced by Bob Young of Waltham, Massachusetts, in 1970.
Vegetable	Tomatillo	Gigante Verde	65-100	The Salsa star! Gigante rocks with flavor, having close to 50% more sugar than other tomatillos. It's also earlier, bigger and tastier than any other. Just right for chili, salsa, soups, and your favorite Latin American dishes. Size: 4" across.
Vegetable	Tomatillo	Grande Rio Verde	75-85	The largest tomatillo variety on the market. The tomatillo of choice for homemade salsa verde with its sweet, bright flavor of green pepper mixed with tomato. Plants produce heavy yields of small husk-covered fruits that fall to the ground at full ripeness.
Vegetable	Tomatillo	Mexican Strain	65	A larger tomatillo, averaging 2" across, Mexican Strain has a more savory flavor. Because of its unique flavor, it is a preferred variety for many Mexican dishes, including salsa verde and chili verde.
Vegetable	Tomatillo	Purple	70	An electric violet color and sweet fruity flavor, plants are prolific covered in large glowing orbs that are mostly purple with just a few partially green fruit in the mix (more sunshine will produce a more pure purple fruit.) Many are a bright violet color throughout their flesh. Much sweeter than the green types, it can be eaten right off the plant.
Vegetable	Tomato	Aunt Ruby's German Green	80-95	<i>Indeterminate</i> . This family heirloom from Germany is the largest green beefsteak variety in the world. Superb, fruity sweet and slightly spicy taste. The bright green tomato makes it a beautiful addition to any salad plate. This tomato can grow fruits of about 1 pound each! Winner of the 2003 Heirloom Garden Show taste test.
Vegetable	Tomato	Berkeley Tie Dye Pink	65-75	<i>Indeterminate</i> . Compact plants produce beautiful 8-12 ounce fruit with a very sweet, rich, complex tomato flavor. Tomatoes are dark pink with green striping, and the flesh is pink with yellow streaks.
Vegetable	Tomato	Big Beef (F1)	75	<i>Indeterminate</i> . F1 Hybrid. The huge globe-shaped fruits size up about 10-12 oz each, without the cracked tops or fibrous interiors of older beefsteak varieties. Best of all, these scrumptious giant slicers are heavy with sweet flesh and lots of juice — perfect for "BLT" sandwiches. Expect full flavor, heavy yields, wide adaptability and truly superior disease resistance
Vegetable	Tomato	Brandywine Black	80-90	<i>Indeterminate</i> . This 1920s variety has a wonderful true tomato flavor that is earthy and sweet at the same time. Deep maroon in color with fruits that grow up to 1 lb each. You can easily use this tomato for buns to make a sandwich! This is perfect for salsas, sauces, and cooking. Heavy yields on vigorous vines will require support for the best harvest.

Category	What	Variety	Days to Harvest	Description
Vegetable	Tomato	Brandywine Red	85	<i>Indeterminate</i> . Flavorful but not acidic, this great-tasting heirloom tomato dates back to the late 1800s! Large-lobed, beefsteak-shaped tomatoes have a thin, pinkish-red skin. Very vigorous. Best if staked, caged, or trellised. Perfect for slicing.
Vegetable	Tomato	Bulgarian Triumph	78	<i>Indeterminate</i> . <b>RARE</b> . A Bulgarian heirloom from Manfred Hahm-Hartmann. Very productive, regular leaf plant that produces extra-sweet, juicy, red, 2-inch, 3-4 ounce, thick-walled fruits in clusters of 5-6. Suitable for cooler growing regions. Very good, rich flavors. Few seeds in 2-3 seed cavities. Great for salads and canning.
Vegetable	Tomato	Carbon	80	<i>Indeterminate</i> . An extremely productive variety, the Carbon tomato has a sweet and smokey taste profile. The perfect salad and sandwich companion, this meaty, 10-14 ounce, deep burgundy red tomato is a delight!
Vegetable	Tomato	Cherokee Carbon (F1)	75-80	<i>Indeterminate</i> . F1 Hybrid. The best of Cherokee Purple and Carbon, these beautiful beefsteaks have a dusky blush and rich, delicious flavor. The bulky, slightly squat fruit average 10-12 ounces each.
Vegetable	Tomato	Cherokee Purple	80	<i>Indeterminate</i> . This heirloom tomato variety consistently ranks very high in taste tests. Slice Cherokee Purple tomato for rich, dark color and unmatched sweet, rich taste on sandwiches or in salads. The tomato is a beautiful dusky pink with a deep, rich-red interior. Cherokee Purple grows well in most regions of the U.S. Let the fruit ripen on the vine for the best flavor.
Vegetable	Tomato	Costoluto Genovese	70-90	<i>Indeterminate</i> . This Italian slicing tomato bares high, disease-resistant yields. The fruits are red and ribbed – a unique shape compared to the traditional round tomato. Use this sweet and juicy variety as a right-off-the-vine snack, or slice it up to toss onto a salad! Early maturing.
Vegetable	Tomato	Crnkovic Yugoslavian	70-90	<i>Indeterminate</i> . Brought into the U.S. by Yasha Crnkovic. Heavy yields of pink beefsteak fruits which weigh up to a pound each. Fruits have near perfect shoulders that rarely crack. Delicious full tomato flavor. Great for fresh eating, sauce, roasting or canning.
Vegetable	Tomato	Dr. Wyche's Yellow	75-85	<i>Indeterminate</i> . This tomato has been a long-standing heirloom favorite for not only the name but also the flavor. This tomato is low acid, rich in flavor, and is a stunning meaty beefsteak variety. Developed by a circus owner and doctor, this tomato was an immediate hit because of the deep tangerine-colored fruits that were unimaginably large. A delicious all-purpose variety.
Vegetable	Tomato	Elbe	86	<i>Indeterminate</i> . <b>RARE</b> . Named after the Elbe River in Germany. This has been an old favorite heirloom tomato since 1889. Big, potato-leaf tomato plants that yield gorgeous 12-14 ounce, 3 to 4-inch, yellow-orange, beefsteak tomatoes with an abundance of delicious, fruity, sweet/tart flavors. A wonderful salad tomato and don't miss trying this for making golden tomato sauce. Suitable for cooler growing regions.
Vegetable	Tomato	Esmeralda Golosina	77	<i>Indeterminate</i> . <b>RARE</b> . Created by Lee Goodwin of J&L Gardens. 5', regular-leaf plants produce 5-10 ounce, small, gorgeous green tomatoes with remarkably intense, sweet, and complex flavors. Said to be among the highest brix level (sweetness) tomatoes you can grow. Disease resistant.
Vegetable	Tomato	Federle	85-95	<i>Indeterminate</i> . This West Virginia heirloom is a giant paste variety that produces high yields of 7" long banana shaped fruits with few seeds. With its acidic and rich tomato flavor, this variety is delicious in salsas and heavy sauces. Ideal for the home garden.

Category	What	Variety	Days to Harvest	Description
Vegetable	Tomato	German Pink	85-90	<i>Indeterminate</i> . Heirloom. One of the tomatoes that originally ignited the heirloom movement in America, this variety originated in Bavaria. The luxuriant potato-leaf plants give high yields of 1- to 2 pound, nearly seedless meaty beefsteak fruits that ripen throughout the season. Few seeds, very little cracking or blossom scars. Full sweet flavor. This gorgeous pink fruit is extremely versatile, excellent for canning and freezing but also for slicing and juicing.
Vegetable	Tomato	Golden Beauty	75	<i>Indeterminate</i> . <b>RARE</b> . Strong, leafy plants yield lots of 2-inch, slightly flattened, beautiful fruits. Color is more an ivory-yellow than gold. Delicious, delicate, sweet, fruity flavors that are clean to the finish and long lasting.
Vegetable	Tomato	Green Zebra	75	<i>Indeterminate</i> . Developed in 1985 by tomato breeder Tom Wagner, this is an unusual and exquisite green tomato chosen by Alice Waters for her restaurant, Chez Panisse, in Berkeley, California. The 2-inch round fruit ripens to a yellow-gold with dark-green zebra-like stripes. The flesh is lime-emerald in color that has an invigorating lemon-lime flavor. A great green tomato for brightening up salads and other tomato dishes.
Vegetable	Tomato	Grightmire's Pride	72	<i>Indeterminate</i> . <b>RARE</b> . Seeds came to North America from Yugoslavia via Fred Grightmire of Dundas, Ontario, Canada. Regular-leaf, wispy/droopy-looking, vigorous plants produce very good yields of 6-14 ounce., heart-shaped, pink tomatoes. Very meaty but also quite juicy, small seed cavities and few seeds. Outstanding, delicious, sweet flavors.
Vegetable	Tomato	Illini Star	72	<i>Indeterminate</i> . <b>RARE</b> . This tomato is an open-pollinated variety developed by Merlyn & Mary Ann Niedens. Regular-leaf plants yield very large crops of 6-8 ounce, round, deep-red tomatoes with an excellent sweet flavor and strong disease and split resistance. An early producing tomato. A good canning tomato and perfect for eating fresh off the vine.
Vegetable	Tomato	Ilse's Yellow Latvian	78	<i>Indeterminate</i> . <b>RARE</b> . A terrific yellow-orange heirloom tomato. Large, regular-leaf tomato plants with wispy leaves yield lots of 10-ounce, 2 to 3-inch, slightly-elongated, yellow-orange tomatoes with very well balanced sweet flavors. Meaty walls makes this a very good sauce tomato. Also a fine salsa tomato. Suited for cooler growing regions.
Vegetable	Tomato	Italian San Marzano	70-90	<i>Indeterminate</i> . The Real Thing! Treasured old Italian variety whose reliable heavy yields of plump, elongated fruit taste great fresh picked and also stand out for cooking into rich, thick sauce.
Vegetable	Tomato	Jaffa	75	<i>Indeterminate</i> . <b>RARE</b> . A prized German tomato developed by Manfred Hahm-Hartmann. Bushy, regular-leaf tomato plants yield huge amounts of beautiful, 2 1/2 inch, plum-shaped, gold tomatoes with impressively sweet, fruity flavors. Meaty and juicy, these tomatoes are perfect as a canning tomato and sauce tomato. A good container tomato selection for a patio garden.
Vegetable	Tomato	Japanese Black Trifele	85	<i>Indeterminate</i> . This pear-shaped tomato is beautiful for its unique colors, ranging from dark red to a deep black. The fruits weigh about 3-5 ounces. Excellent, rich flavor. Harvest when shoulders are still green for best flavor. This tomato is perfect for canning because it maintains its color through the canning process. Prolific producer.
Vegetable	Tomato	Jennie	74	<i>Indeterminate</i> . <b>RARE</b> . A Polish Heirloom brought to the US in the early 1900's by Stanley Hajkowski. Tall, bushy, potato-leaf, disease resistant plants bear abundant crops of 14-16 ounce, pink, smooth, beefsteak tomatoes that rival Brandywine for delicious flavor.

Category	What	Variety	Days to Harvest	Description
Vegetable	Tomato	Kellogg's Breakfast	75-80	<i>Indeterminate</i> . Heirloom. A beautiful orange beefsteak preserved by our friend Darrell Kellogg, a railroad supervisor from Redford, Michigan. Its fruit is very flavorful and superbly sweet! This delicious heirloom originated in West Virginia. A favorite of Dr. Carolyn Male, author of "101 Heirloom Tomatoes."
Vegetable	Tomato	Kornesevsije	85	<i>Indeterminate</i> . <b>RARE</b> . Russian heirloom first offered in the 1993 Seed Savers Yearbook by Carolyn Male who obtained the seeds from Norbert Parreira in France. Regular-leaf plants produce abundant yields of large, 10-16 ounce., dark-pink, heart-shaped tomatoes with very meaty flesh, few seeds and little juice. Excellent flavor. Suitable for cooler growing regions.
Vegetable	Tomato	Marvel Stripe	80	<i>Indeterminate</i> . Heirloom with strong, climbing vines bearing large sunny gold fruits shot through with rose-red, giving them a beautiful marbled effect. Flavor is mild, sweet & smooth.
Vegetable	Tomato	Marz Round Green	80	<i>Indeterminate</i> . <b>RARE</b> . A natural cross by Jeff Dawson. Regular-leaf tomato plants yield a generous crop of 2-inch, round, lime-green, tomatoes with darker green shoulders. Wonderful, tangy-sweet flavors makes this tomato variety a great addition to a tomato salad.
Vegetable	Tomato	Opalka	85	<i>Indeterminate</i> . This Polish heirloom produces large, pointed, pepper-looking tomatoes weighing 5 to 8 ounces. Very minimal seeds and jell make this tomato a go-to for authentic tomato paste, tomato sauce or anything else that requires a meaty and flavorful tomato. The flavor profile of this tomato combines classic tangy tomato, a savory zip from acid and a slight fruity undertone, creating the perfect balance between sweet and acidic. Very disease resistant.
Vegetable	Tomato	Paul Robeson	90	<i>Indeterminate</i> . Heirloom. A Russian variety lovingly named for the famous Opera singer Paul Robeson. Amazing flavor that is distinctive: smoke and sweet. Seven to 10 ounce fruit, brick-red color.
Vegetable	Tomato	Porter	75-85	<i>Indeterminate</i> . This heirloom was developed for the heat of Texas. An egg-shaped, dark pink variety that sets fruit even in hot, dry climates. Perfect for canning or juicing. Plants are very productive and drought resistant. Fruit grows from 2-4 ounces apiece.
Vegetable	Tomato	Purple Russian	76	<i>Indeterminate</i> . AKA Ukrainian Purple. Produces huge amounts of purple-red, 5-7 ounce., 3-4 inch long, plum-shaped tomatoes with a blemish-free skin excellent sweet flavor. A perfect tomato for enjoying in salads, for making fabulous tomato sauce or salsa, or canning. Grows well in cooler climates.
Vegetable	Tomato	Rawlings	80	<i>Indeterminate</i> . <b>RARE</b> . Regular-leaf plants produce a heavy crop of large, pink, mostly heart-shaped fruit with exceptional, complex flavors. This tomato originates from the Rawlings family in Belfry, Kentucky.
Vegetable	Tomato	Roma	75	<i>Determinate</i> . Prized for its use in tomato paste and sauces, Roma produces a large harvest of thick-walled, meaty, bright red, egg-shaped tomatoes about 3" long, with few seeds. This tomato is not juicy. This is not a slicing tomato. Instead, the flesh is thick and drier so that it will cook down into a thick sauce. Cooking intensifies flavor, too. If you can tomatoes, make your own spaghetti sauce, or like to chop a tomato into an omelet, this is a great choice. It's not too juicy in the pan compared to slicing tomatoes. The fruit also freezes well for later cooking.
Vegetable	Tomato	Slava	65	<i>Indeterminate</i> . <b>RARE</b> . A potato-leaf variety from Czech Republic. Its name means 'glory.' Plants produce abundant quantities of 2-inch, 1-2 ounce, red, round, early tomatoes. Delicious tomatoey flavors. Excellent choice for canning, or sliced into salads. Blight resistant.

Category	What	Variety	Days to Harvest	Description
Vegetable	Tomato	Tigerella	55-65	<i>Indeterminate</i> . The Tigerella tomato is a English heirloom that grows tangy, bite-sized fruits that are red with orange stripes. Perfectly round fruits reach 2" in diameter. Enjoy this variety right off the vine or thrown into your favorite salad. Expect large yields! It is more cold hardy than other varieties and thrives in humid summers. Disease resistant and grows well in greenhouses.
Vegetable	Tomato	Trucker's Favorite	75	<i>Indeterminate</i> . Uniform 3 inch pink globes grow in clusters of 3-4. Excellent, rich flavor. Productive plants with good blight resistance. This variety is good for fresh eating, sauce, roasting, canning or freezing.
Vegetable	Tomato	Yasha Yugoslavian	85	<i>Indeterminate</i> . <b>RARE</b> . An heirloom tomato obtained by Yasha Crnkovic, who received seeds from relatives in the Vojvod area of Yugoslavia. Vigorous, regular-leaf tomato plants yield copious amounts of extra-large, 1-2 pound, heart-shaped, pink beefsteak tomatoes that are full-flavored and deliciously juicy. A crack-resistant tomato variety. A great tomato for eating fresh in salads or sliced thick for sandwiches.
Vegetable	Tomato	Yellow Bosnian	73	<i>Indeterminate</i> . <b>RARE</b> . An old heirloom tomato from Yugoslavia. A shorter, regular-leaf, plant that produces a very heavy yield of 10 ounce, slightly-flattened, yellow, oblate beefsteak tomatoes with deliciously rich, well-balanced, slightly sweet flavors.
Vegetable	Tomato	Backa	80	<i>Determinate</i> . <b>RARE</b> . Short, compact plants yield an abundance of 12-16 ounce, red, beefsteak tomatoes with big, delicious tomatoey flavors. An excellent canning and sauce tomato and a wonderful slicer for sandwiches.
Vegetable	Tomato	Chianti Rose	80	<i>Indeterminate</i> . This big, beautiful beefsteak tomato with fabulous flavor is a cross between the famous pink Brandywine and a treasured family variety from Italy. Juicy, flavorful and heavy in the hand, Chianti Rose tomatoes are thin skinned with smooth, creamy flesh and glowing rosy-red color. The strong vigorous vines with potato leaf foliage tolerate cooler summers and are more crack-resistant and uniform than other large fruited heirlooms. Huge harvests of these scrumptious tomatoes are a highlight of our summers!
Vegetable	Tomato	Homestead	80-85	<i>Semi-determinate</i> . Strong plant, big leaves, firm, meaty, bright-red medium-sized fruit. Fusarium wilt and crack resistant. Performs well in warm and humid regions as well as more temperate regions.
Vegetable	Tomato - Cherry	Amy's Apricot	74	<i>Indeterminate</i> . This is a family heirloom given to Dustin Swanland by his Italian aunt. Tall indeterminate plants yield huge amounts of 3/4 inch golden cherry tomatoes that are bursting with robust flavor. Many tomato lovers find this a rival to Sungold for flavor.
Vegetable	Tomato - Cherry	Bi-color Cherry	75-80	<i>Indeterminate</i> . The German heirloom Bi-color Cherry tomato plants produce ample yields of colorful cherry tomatoes. The plants are strong and tall, so staking is recommended. The globe shaped 1-2 inch cherry tomatoes are sweet and delicious, and the interesting colors make for a nice variation.
Vegetable	Tomato - Cherry	Black Cherry	65	<i>Indeterminate</i> . Beautiful black cherries look like large, dusky purple-brown grapes; they have that rich flavor that makes black tomatoes famous. Large vines yield very well; very unique and delicious.

Category	What	Variety	Days to Harvest	Description
Vegetable	Tomato - Cherry	Black Plum	82	<i>Indeterminate.</i> Origin from Russian seedswoman Marina Danilenko. Sprawling indeterminate plant produces an abundant, long and steady crop of 2 inch, elongated, oval, plum-shaped fruits that are colored a beautiful deep-mahogany with dusky-green shoulders and garnet red flesh. Fruit resembles a small paste tomato but with thinner walls. Unique, sweet, tangy, rich, complex flavors. Great for snacking off the vine, sliced and scattered into a salad or making a rich, dark-colored pasta sauce.
Vegetable	Tomato - Cherry	Blush	75	<i>Indeterminate.</i> This beautifully bright sunset orange fruit has a unique flavor. Sweet, with tropical notes, this variety is delicious eaten fresh and is the perfect size for adding to salads. It can be picked prematurely to reach ripeness off of the vine.
Vegetable	Tomato - Cherry	Brad's Atomic Grape	75	<i>Indeterminate.</i> Elongated, large cherries in clusters. The color (and flavor!) is a full-blown assault on the senses—lavender and purple stripes, turning to technicolor olive-green, red, and brown/blue stripes when fully ripe.
Vegetable	Tomato - Cherry	Brandy Sweet Plum	75	<i>Indeterminate.</i> AKA Brandysweet Plum. This is a wonderful, open-pollinated, compact, potato-leaf, tomato variety that was an accidental cross between Brandywine and Sweet 100, yielding abundant crops of 2 ounce, jade-pink, elongated cherry fruit with the rich, complex flavors of Brandywine combined with the pronounced sweetness of Sweet 100. A great snacking and salad tomato.
Vegetable	Tomato - Cherry	Camp Joy Cherry	70	<i>Indeterminate.</i> Camp Joy cherries offer full, well-rounded tomato taste in a cherry tomato, not just sugar-lump sweetness without depth of flavor. The strong growing vines bear big, heavy clusters of large-sized luscious red cherries, whose taste becomes an annual summer passion.
Vegetable	Tomato - Cherry	Galina	65-75	<i>Indeterminate.</i> Potato leaf variety with very early, bright yellow cherry tomatoes approx 1 inch diameter. Taste is somewhat reminiscent of a yellow pear tomato grown in the heat of the Midwest. Fragrant with a nice burst of subtle sweetness and thinner skin. Resists cracking at all costs! Let ripen to golden yellow for the richest taste. Very productive resisting light frosts. They'll last for a month or two once picked, too!
Vegetable	Tomato - Cherry	Gardener's Delight	65	<i>Indeterminate.</i> Pop a few of these sweet delights in your mouth while gardening! Reviews have proclaimed this 1950s German heirloom the best cherry tomato; extra sweet and packed with flavor. Produces many clusters of 6–12 tomatoes all summer until frost. Vigorous vines easily reach 6' long.
Vegetable	Tomato - Cherry	Gold Nugget	55	<i>Determinate.</i> An early, prolific, golden cherry tomato. 5-20 gram, round to slightly oval cherry tomatoes have a deep-yellow color. The flavor is well-balanced and delicious, and a majority of the early fruits are seedless. Healthy, compact plants with a concentrated early set. Suitable for cooler climates. Developed by Dr. James Baggett, Oregon State University.
Vegetable	Tomato - Cherry	Green Grape	60-70	<i>Indeterminate.</i> This variety has a rich combination of sweet and spicy flavors. Extremely productive with heavy yields of lime-green fruit. Disease and heat resistant. Great for snacking.
Vegetable	Tomato - Cherry	Ildi	54	<i>Indeterminate.</i> An early, high-yielding grape tomato. Six', regular-leaf, vigorous, prolific tomato plants that yield HUGE amounts of 1", SWEET bright-yellow, oval (with occasional pear-shaped fruits), 'grape' tomatoes with up to 75 tomatoes in every bunch! These yummy tomatoes usually produce until frost. Great for serving in salads or snacking off the vine.

Category	What	Variety	Days to Harvest	Description
Vegetable	Tomato - Cherry	Large Red Cherry	75	<i>Indeterminate.</i> A bounty of big, beautiful cherry tomatoes that grow in clusters on long vines. Deep red fruits are 1-1 ¼" in diameter and bursting with sweet flavor. Delicious fresh from the garden and wonderful for canning. <b>Easy to grow and harvest.</b>
Vegetable	Tomato - Cherry	Lollipop	79	<i>Indeterminate.</i> Disease-resistant, big, bushy, regular-leaf plants with wispy foliage that yield huge amounts of 1¼", almost translucent, creamy, yellow cherry tomatoes in clusters of 6-10. Fruits have unique, fruity-sweet, lemony flavors unlike other cherry tomatoes. Produces fruit continuously, even under high temps. Great as a salad tomato, a snacking tomato, or for adding to culinary creations.
Vegetable	Tomato - Cherry	Mirabell	75	<i>Indeterminate.</i> <b>RARE.</b> Mirabell AKA Mirabelle. An old French heirloom that is also used commercially in Germany. Regular-leaf plants produce 3/8" yellow cherry tomatoes in many clusters of 6 to 8 fruits. Excellent tart-fruity flavor. A great snacking or salad tomato.
Vegetable	Tomato - Cherry	Petit Chocolate	70-75	<i>Indeterminate.</i> <b>RARE.</b> Bred by J & L Gardens Seeds from the crossing of "Rideau Sweet" and "Sara Galapagos." Regular leaf plants produce huge vines with abundant crops of 1½", rich, chocolate fruit. The round to mini beefsteak-shaped cherries hold well on the vine and have a wonderfully rich and distinctive flavor.
Vegetable	Tomato - Cherry	Pink Ping Pong	75	<i>Indeterminate.</i> <b>RARE.</b> Regular-leaf, compact, bushy plants produce amazing yields of sweet, pink fruits the size of ping pong balls, 1-3 ounces. These tomatoes are juicy and bursting with superb flavors. Great for salads, canning or popped in your mouth off the vine.
Vegetable	Tomato - Cherry	Red Pear	70	<i>Indeterminate.</i> Vigorous medium-large plants produce clusters of sweet scarlet-red pear-shaped fruits. Flavorful salad tomato that bears all summer, making garden snacking a primary activity while working outside! Red Pear is a great option for canning, preserving and eating fresh.
Vegetable	Tomato - Cherry	Rose Quartz	75	<i>Indeterminate.</i> A very productive heirloom cherry plant from Japan producing large pink cherries in clusters. Absolutely delicious flavor.
Vegetable	Tomato - Cherry	Salisaw Café	58	<i>Indeterminate.</i> <b>RARE.</b> Salisaw Café AKA Sallisaw Café. A wonderfully delicious, early producing cherry tomato to rival Sungold tomato in flavor. Regular-leaf plants form tall, very productive vines that have huge yields of 3/4", bright-red cherry tomatoes with that perfect combination of super sweet but slightly tart flavors.
Vegetable	Tomato - Cherry	Sprite	60	<i>Determinate.</i> If you love grape tomatoes and do not have the space for bigger, indeterminate plants, this tomato variety is perfectly suited to small gardens and patio gardening. Short, very productive, regular-leaf tomato plants yield small, brilliant red, oval grape tomatoes borne in large numbers with refreshingly sweet flavors. Just like the original grape tomatoes, these have thin skins and are packed with sweet juice. Produces tomatoes continuously all season until first frost. An early season tomato. Excellent in salads or eating fresh.
Vegetable	Tomato - Cherry	Sungold (F1)	67	<i>Indeterminate.</i> F1 Hybrid. Sungold's rich-tasting, juicy cherries are borne on long trusses for seasons long harvests of exceptional quality, superb orange color and the sweetest tomato flavor. Sungold vines are vigorous, early to bear, crack resistant and resistant to Fusarium, Verticillium, and TMV.
Vegetable	Tomato - Cherry	Super Snow White	75	<i>Indeterminate.</i> Very sweet, 2 ounce, ivory-colored tomatoes, larger than Snow White, but similar in taste. They ripen to reach almost the size of ping pong balls. These tomatoes are perfect for cutting in half to expose the beautiful interior and serving in salads.
Vegetable	Tomato - Cherry	Supersweet 100 (F1)	60	<i>Indeterminate.</i> F1 Hybrid. The classic sweet red cherry tomato. Reliable cherry with prolific yields of great-tasting, 15–20 gram fruits produced in large clusters. Widely adapted. High resistance to Fusarium wilt and Verticillium wilt.

Category	What	Variety	Days to Harvest	Description
Vegetable	Tomato - Cherry	Sweet Gold (F1)	70	<i>Indeterminate</i> . F1 Hybrid. Most yellow cherry tomatoes are grown mainly for their color not taste, but Sweet Gold has both full, sweet tomato flavor and jewel toned golden yellow fruits. These glossy 1" cherries are delicious eaten right from the vine, enjoyed for snacks, or for adorning summer salads and stir fries. The vigorous indeterminate vines grow effortlessly, start bearing early and reliably produce heavy clusters of these brightly colored, tasty little fruits throughout the summer.
Vegetable	Tomato - Cherry	Tommy Toe	70-75	<i>Indeterminate</i> . Tommy Toe AKA Steakhouse. This heirloom tomato originating from the Ozark mountains in the 1900s is famous for its flavor. Large sprawling indeterminate plants yield copious amounts of 1", bright red, cherry tomatoes with excellent flavor and plenty of juice. This variety has a good resistance to most diseases. Great for salads and can even be used for juice. Also a good choice for cooler growing regions.
Vegetable	Tomato - Cherry	Tropical Sunset	65	<i>Indeterminate</i> . A bright bi-colored variety with the perfect balance of sweetness and acidity. Golden with orangy pink stripes. A cherry sized heirloom. Fruit will stay in the ripe stage for a long time, providing a good shelf life.
Vegetable	Tomato - Cherry	Yellow Pear	75	<i>Indeterminate</i> . This extremely beautiful heirloom tomato variety makes a vigorous plant that bears enormous numbers of bright yellow, bite-sized fruit. The flavor is deliciously tangy. Perfect for summer party hors d'oeuvres.
Vegetable	Tomato - Dwarf/ Container	Black Sea Man	75	<i>Determinate</i> . A Russian Heirloom tomato. Small, potato-leaf plants yield an abundant set of 12-16 ounce beautiful tomatoes that are rich mahogany colored with olive green shoulders when mature. Tomato interiors are deep, reddish green and loaded with excellent, full-bodied, complex, intense, creamy tomato flavors. This is an outstanding tomato for sandwiches and salads. Does well growing in mid-sized containers. A great early black tomato.
Vegetable	Tomato - Dwarf/ Container	BrandyFred	75	<i>Indeterminate</i> . Dwarf, rugose, potato-leaf variety that produces high yields of 10-16 ounce, smooth, oblate, purple fruit that possess rich, well-balanced, delicious flavors. History: This Dwarf Tomato Project variety, introduced in 2016, was selected from the "Tasty family" (a cross made and named by Vince Lavallo in 2008 between Dwarf Wild Fred and Brandywine). This variety is associated with the Open Source Seed Initiative (OSSI)
Vegetable	Tomato - Dwarf/ Container	Dwarf Beauty King	75	<i>Indeterminate</i> . Vigorous dwarf (tree-type) plants with regular-leaf, rugose foliage, produce 6-12 ounce (medium-large), round, oblate, red fruits with beautiful golden stripes and speckles. Very few seeds. Outstanding, rich, sweet flavors. Occasionally produces very large fruits. History: Developed from 2011-2016 by the members of the Dwarf Tomato Project from a cross between Dwarf Wild Fred (an F4 selection) and Beauty King made by Vince Lavallo in 2011, which he named Beauty. It was selected and named collaboratively by Vince Lavalle, Craig, Bill Yoder, Kay Robbins, and Susan Oliverson. Released in 2016 by Victory Seed Company. This variety is associated with the Open Source Seed Initiative (OSSI)

Category	What	Variety	Days to Harvest	Description
Vegetable	Tomato - Dwarf/ Container	Dwarf Blazing Beauty	75	<i>Indeterminate</i> . This is the first orange dwarf project release. Vigorous, mid-season, potato-leaf, dwarf plants produce 3-8 ounce, medium size, oblate fruit with a deep orange inside and out. Delicious flavor with plenty of sweetness and a pleasurable acidic bite. History: Developed in the 2006-2013 by the members of the Dwarf Tomato Project from a cross between Golden Dwarf Champion and Elbe (Topsy family), as collaborative work of Patrina Nuske Small, Craig LeHoullier (who named it), John Schmuck, Amanda Fischer, Bill Yoder, Dee Sackett, Doug Frank, and Susan Oliverson. This variety is associated with the Open Source Seed Initiative (OSSI)
Vegetable	Tomato - Dwarf/ Container	Dwarf Hannah's Prize	75-80	<i>Indeterminate</i> . Regular, rugose-leaf, dwarf plant produces abundant crop of 6-12 ounce, oblate, red with light striping, tomatoes with very nice, well-balanced, slightly tart flavors. History: Developed by the Dwarf Tomato Project. (Softy family) The Softy family was created by Sherry Long in 2012 by crossing German Red Strawberry with Dwarf Stone. Dwarf Hannah's Prize was selected and named by Susan Oliverson, who carried out essentially all of the remaining stabilization effort, with a bit of work from Dee Sackett and Craig LeHoullier.
Vegetable	Tomato - Dwarf/ Container	Dwarf Saucy Mary	65	<i>Indeterminate</i> . Regular leaf, dwarf plant, produces loads of 4-6 ounce, Roma-shaped, green flesh tomatoes with dark and light green stripes, excellent delightful flavors. Great for sauces and salsa. History: Developed by the Dwarf Tomato Project. (Kiwi family) Sherry Long created the Kiwi family by crossing Dino Eggs with an F2 selection from the Lazy family in 2012. Craig LeHoullier selected and named Dwarf Saucy Mary for his wife Susan's Aunt Mary Kelly.
Vegetable	Tomato - Dwarf/ Container	Fred's Tie Dye	75	<i>Indeterminate</i> . Dwarf ('tree-type') plants with rugose, regular-leaf foliage produce 5-6 ounce, medium sized, oblate, purple tomatoes with jagged gold and green stripes and the deep crimson flesh of black tomatoes. Rich, intense, and balanced flavors, more acidic than sweet. History: Developed by the members of the Dwarf Tomato Project from a cross between Dwarf Wild Fred and Pink Berkeley Tie-Dye made by Vince Lavallo and named Messy. It was selected and named by Vince. This variety is associated with the Open Source Seed Initiative (OSSI).
Vegetable	Tomato - Dwarf/ Container	Geranium Kiss	65	<i>Determinate</i> . This dwarf variety will grow in a small bush-like formation that will grow up to 24-30" tall. Produces golf-ball-sized fruits that are bright red with a rich tomato flavor. Great for small areas or for growing in pots.
Vegetable	Tomato - Dwarf/ Container	Red Robin	54	<i>Determinate</i> . Red Robin is a wonderful super-dwarf determinate cherry tomato that can be grown in a hanging container or pot indoors or outdoors. Dwarf, early plants, 9 -12" tall, yield tight, abundant bunches of 1 1/4", red, cherry tomatoes that are SWEET with just enough tartness to perfectly support its delicious flavors. A great snackin' tomato.

Category	What	Variety	Days to Harvest	Description
Vegetable	Tomato - Dwarf/ Container	Rosella Purple	78	<i>Indeterminate</i> . Perfect for a large container or a small garden space. Dwarf (tree-type) plants with regular, rugose foliage (with stout central stem, growing to three to four feet in height), produce large yields of 6-12 ounce, medium-large, oblate, ripening to a rich deep purple exterior and rich crimson interior with small seed locules. Similar to Cherokee Purple in color, size, shape and flavor but on a dwarf growing plant. Excellent, delicious, BOLD flavors. History: Dwarf Tomato Project. Originated from a cross between Budai and Stump of the World made by Patrina Nuske Small in Australia. A subsequent selection was discovered and grown out by famed tomato breeder, Craig LeHoullier in its ninth generation and introduced by Victory Seed Company in 2011. This variety is associated with the Open Source Seed Initiative (OSSI).
Vegetable	Tomato - Dwarf/ Container	Sean's Yellow Dwarf	80	<i>Determinate</i> . Tree-type, regular-leaf dwarf producing lots of 3-7 ounce, smooth, medium-sized, oblate, bright-yellow fruits with a very pale yellow juicy flesh, with refreshing, bright, delicious flavors. History: Developed 2006-2013 by the members of the Dwarf Tomato Project from a cross between Budai Torpe and Cherokee Green made in 2006 by Patrina Nuske Small in Australia. It was the collaborative work of Patrina Nuske Small, Lee Newman (who named it after his friend, Sean, in whose garden it first appeared), Linda Stormes, Ginny Bishton, Ruth TenBrink and Craig LeHoullier. This variety is associated with the Open Source Seed Initiative (OSSI).
Vegetable	Tomato - Dwarf/ Container	Tasmanian Chocolate	65	<i>Indeterminate</i> . Regular-leaf, rugose foliage, 3-4', dwarf plant with stout central stem, produces a big crop of oblate, 5-7 ounces, tomatoes that ripen to a deep mahogany color. The flavor is well balanced, sweet and delicious. History: Developed by the Dwarf Tomato Project. Originated from a cross made by Patrina Nuske Small between New Big Dwarf and Paul Robeson, named Happy. Tasmanian Chocolate was selected and named by Linda Reid.
Vegetable	Tomato - Dwarf/ Container	Tiny Tim	50	<i>Determinate</i> . Regular-leaf, miniature tomato plants that grow to 12" high and yield small braids of 3/4", red, round, cherry tomatoes. This is a perfect tomato for growing in pots any time of the year inside the house or in limited space gardens outside. Fruit is juicy and has very good sweet/tart tomato flavors. An early season variety for those who choose to harvest tomatoes as early as possible.
Vegetable	Tomato - Dwarf/ Container	Uluru Ochre	65	<i>Indeterminate</i> . Compact ('tree-type') plants with rugose, regular-leaf foliage produce prolific amounts of 6-12 ounce, ruffled, uniquely-colored tomatoes that are "essentially the first 'black/orange' we've seen" with orange flesh with green overtones, and somewhat amber/orange/green in appearance. The flavors of this variety are superb with full, well-balanced, fruity tartness to balance the sweetness. The fruit can be a bit variable season to season, but at its best, it has an absolutely delicious, smokey flavor. History: Dwarf Tomato Project. Uluru Ochre originated as a cross between Orange Heirloom and Rosella Purple made by Patrina Nuske Small and named "Rosey." Uluru Ochre was selected and named by Patrina. Introduced in 2015. This variety is associated with the Open source Seed Initiative (OSSI).

Category	What	Variety	Days to Harvest	Description
Vegetable	Tomato - Dwarf/ Container	Wherokowhai	90	<i>Indeterminate</i> . This is the first bicolored offering from the Dwarf Tomato Project. Potato-leaf dwarf plants produce medium to large, oblate fruits with colored yellow with red swirls. Outstanding sweet, complex, well-balanced flavors. History: The name is pronounced "fer-dow-co-fi", which is a native New Zealand Maori word that means 'red/yellow'. The variety was named by New Zealand project member Richard Watson. Developed 2009-2013 by the members of the Dwarf Tomato Project from a cross between Dwarf Russian Swirl (out of the Dopey family) and Lucky Cross (Dizzy family). Introduced in 2015. This variety is associated with the Open Source Seed Initiative (OSSI).
Vegetable	Watermelon	Ali Baba	80-90	The 12-30 lb melons have hard light green rinds that make them perfect for shipping and storage. The light color makes them resistant to sun burning. Plants are large, vigorous and give heavy yields of oblong fruit, which do well in many conditions. The flavor is superb, being very sweet and luscious; and the texture is very crisp.
Vegetable	Watermelon	Charleston Gray	85-100	You'll have lots of thick slices for those late summer barbecues and picnics! This open-pollinated melon, developed by renowned watermelon breeder Charles Andrus, of the USDA in Charleston, SC, was the first to be resistant to both Fusarium wilt and anthracnose disease. Greenish-gray rind protects melon from sunburn. It is still affectionately called "that gray melon from Charleston". Fruits average 22"–26" long and 25–35 pounds.
Vegetable	Watermelon	Crimson Sweet	85-90	Nothing says 'summertime' quite like slicing into the emerald-striped rind and ruby-red flesh of a Crimson Sweet! Make sure to provide ample growing space for this popular variety's lengthy vines and large fruits, which reach up to 25 pounds.
Vegetable	Watermelon	Golden Midget	70	An outstanding little watermelon, with golden-yellow rind and salmon pink flesh. Pleasantly sweet, about 3 pounds in weight. Bred by Elwyn Meader and Albert Yaeger at UNH in 1959; a cross between New Hampshire Midget and Pumpkin Rind. Has a built-in ripeness indicator: fruits turn yellow when ready.
Vegetable	Watermelon	Mini Love (F1)	70	F1 Hybrid. Personal-sized, early, and delicious. Sweet and firm, oval-round fruits avg. 5–7 lb. Distinctive, bright green rind with dark green stripes and dense, bright red flesh. Very productive. Mini Love's seeds are smaller and less abundant than those of a typical diploid. Excellent field-holding ability and shelf life. Avg. 2–4 fruits/plant.
Vegetable	Watermelon	Sugar Baby	85	Its flavor is in its name as Sugar Baby is nice and sweet — just like sugar! This fruit grows to about 8 pounds, which is just the right size for your refrigerator. It is an early season variety that's high in vitamins A, B, and C, too.
Vegetable	Watermelon	Tendersweet Orange	95	These oblong watermelons are both lovely and delicious. The strong rinds and sweet orange flesh with high sugar content make these a favorite for many. They grow about 18" long and weigh about 35 pounds when they reach maturity after 95 days of growing.
Vegetable	Zucchini	Black Beauty	50	This zucchini squash is delicious when sliced and served fresh, fried, steamed, or simmered. Its dark green fruits have a creamy white flesh that taste best when harvested at 6"-8" long. High in vitamin A.
Vegetable	Zucchini	Dark Green	50	When this long green squash is mature it can be up to 10-12" in length! Ideal for multiple cooking dishes and baked goods such as cakes, breads and muffins. A summer squash, this green zucchini is a delight in the kitchen.

Category	What	Variety	Days to Harvest	Description
Vegetable	Zucchini	Grey	50	This popular variety grows up to 18-24" height and is known for its slightly sweet, nutty taste. From zucchini bread to omelets and pizza, Grey Zucchini adds flavor and nutrition to various dishes. Growing this variety yields an abundance of squash, so harvesting is effortless. Enjoy the unique flavor of Grey Zucchini in your favorite recipes.
Vegetable	Zucchini	Italian Striped	55	Italian Striped Zucchini Summer Squash has very long, dark green fruit with light green vertical stripes. Called Cocozella di Napoli in the 19th century, it is a compact bush type plant that can be grown in any sunny spot in the garden or in a large container. Dark and light green striping. Straight fruit with very slight ribbing over the lighter green striping. Nutty Delicious Slight Flavor.
Vegetable	Zucchini	Romanesco	52	This distinctive zucchini is medium gray-green, with pale green flecks and prominent ribs. Big, large-leafed, semi-vining plants with only about half the yield of hybrids, but much better flavor; clearly better textured, nutty, and delicious, raw or cooked. Also a good producer of heavy male blossoms for cooking.
Vegetable	Zucchini	Round	45	This tasty little round squash is packed full of mellow, sweet flavor. Especially suited for stuffing, or as individual serving soup bowls, but delicious in any way summer squash is used. Harvest at 3"-4" wide. The blossoms are scrumptious fried!
Vegetable	Zucchini	Sure Thing Hybrid	48	Sure Thing Hybrid produces strong flavored, medium-sized fruits early, even in cool, cloudy conditions. Harvest often and when fruits are small for great taste. Sow in rich, fertile soil after danger of frost. This variety harvest often and when fruits are small.
Vegetable	Cantaloupe	Hearts of Gold	80	Hearts of Gold' is a high-quality heirloom that can be grown in short season climates. These very productive plants produce fruit that is dark orange, firm-fleshed, and aromatic. Round, 3-pound fruits up to 6" in diameter.
Vegetable	Watermelon	Petite Yellow	65-80	A deliciously sweet and refreshing small "icebox" watermelon with pale yellow flesh. Ideal for small families—and small refrigerators. Early maturity, adapted to short-season areas. Excellent market variety. This variety will grow well in most regions of the United States.
